**120VAC 26 LED GloZone™ leak detection light**  
Model No. 1920-7003

- 26 True UV LEDs make leak detection dye glow brightly even under bright light
- Slim design and positioning of LEDs out the side of the light allow the technician to find leaks in even the tightest locations.
- 20' cord provides long reach
- Model no. 1920-7000 12VDC model comes with battery clamps
- Model no. 1920-7001 12VDC model comes with cigarette lighter plug

**120VAC 26 LED GloZone™ Combo leak detection light**  
Model No. 1920-7004

- Unit is provided with a black light lamp assembly and a white light lamp assembly.
- Simply unscrew one lamp assembly from handle and install the other to change from leak detection to work light - no tools required!
- 20' cord provides long reach
- Model no. 1920-7005 12VDC model comes with battery clamps
- Model no. 1920-7006 12VDC model comes with cigarette lighter plug

**120VAC Stubby II® GloZone™ fluorescent leak detection light**  
Model No. 1309-2505

- 9-watt fluorescent black light blue lamp comes with our patented rough service feature
- Special acrylic outer tube allows maximum UV through for bright dye glow
- 120V model comes with 25' 18/2 SJTOW cord is oil resistant
- 120V ballast is located inside the fixture handle
- 12Volt DC models come with 20' cord
- Model No. 1309-2010 12VDC model comes with battery clamps
- Model No. 1309-2004 12VDC model comes with cigarette lighter plug

**120VAC 15-watt GloZone™ fluorescent leak detection light**  
Model No. 1315-2500

- 15-watt fluorescent black light blue lamp provides light over a longer area
- Fixture length is 22' long
- On-off switch is located under the domed end cap
- 25' 18/2 SJTOW cord is oil resistant
- Model No. 1315-2011 12VDC model comes with battery clamps
- Model No. 1315-2010 12VDC model comes with cigarette lighter plug
Oil/Petroleum Products Dye
GloZone™ oil dye is used to find leaks in systems containing petroleum-based products such as engine oil, gas, diesel fuel, power steering fluid, and transmission fluid. One ounce will treat up to 5 quarts of motor oil. More dye may be necessary if the oil is excessively dirty. Available in packs of six 1-ounce bottles or one 8-ounce reservoir bottle.

Universal A/C Dye
GloZone™ Universal A/C Dye meets all major automotive manufacturers standards to be used in R12, R22 and R134A air conditioning systems. One-quarter ounce is all that is needed for a typical automotive A/C system. Available in packs of twelve ¼-ounce bottles or one 8-ounce reservoir bottle.

Water/Coolant Dye
GloZone™ water/coolant dye can be used to detect leaks in automotive radiators/coolant systems. One ounce will treat up to 4 gallons of coolant. Available in packs of six 1-ounce bottles or one 8-ounce reservoir bottle.

{ Injectors }

GloZone Gun™
Model No. 5900-1000
Provides easy, quick insertion of Universal A/C dye into an air conditioning system. The standard 8-ounce cartridge, will service up to 64 automobiles before a new cartridge will be needed. R12/22 and R134A fittings are included with the gun. Uses replacement dye cartridge number 5900-0006.

GloZone™ Hand Turn Dye Injector
Model No. 5900-1001
Hand Turn Dye Injector allows the technician to inject dye into an air conditioning system by attaching to the low-pressure port and simply rotating the handle. R12/22 and R134A fittings are included with the injector. See chart at top of page for bottles of GloZone™ universal A/C dye.

GloZone™ Inline Injectors
Model No. 5000-0034 (R134A) and 5000-0035 (R12/R22)
Provides economical injection of dye into an air conditioning system by installing on a refrigerant tank or manifold gauge set and attaching to the low-pressure port. See chart at top of page for bottles of GloZone™ universal A/C dye.
Saf-T-Lite® Fluorescent Curing Lights

PROBLEM: A loose stone bounces up off the road and chips your car windshield.

SOLUTION: Your local glass repair shop repairs the crack with a resin compound that cures when exposed to ultra violet light. Because quick curing time is critical, the 9-watt STL Curing light is ideal due to its high UV intensity. The 15-watt STL light is longer and ideal for larger cracks. Curing time is usually under one minute! A variety of STL curing lights are available (see model no. chart below). If you have any questions concerning our curing lights, please contact your local Saf-T-Lite® distributor or call us at the factory.
