{ The Stubby II® Cordless LED }

Don't worry about coming to the end of your rope. Go cordless! The Stubby II Cordless LED with a 7.4 volt Lithium Polymer battery pack gives you the freedom to go anywhere your work takes you. Operating 8 hours straight on a full charge, the battery will last a full work shift. Need more run time? Simply purchase a second battery pack and never run out of power! The LEDs used in the Stubby II Cordless provide bright light comparable to a fluorescent work light and with the end LED; you can replace your flashlight too.

{ features }

- Four 1-watt high output side LEDs with 120 - degree angle provide 480 lumens of bright white light.
- One 1-watt high output lensed end LED provides 120 lumens of bright spotlight power.
- Covered on off switch controls side and end LEDs.
- Polycarbonate outer tube is virtually unbreakable.
- 7.4-volt Lithium Polymer rechargeable battery pack operates the light for 8 hours straight when fully charged.
- 100v/240v universal charger will charge the battery in 4 hrs.

SAFT/LITE
By General Mfg., Inc.

- Battery charge indicator light in handle of light fixture comes on warning the user when battery power is low. Cut-off circuitry in the light prevents damage from running the battery down too low.

- Removable battery can be charged in four hours.
- Models are available with one or two battery packs.
- Lithium Polymer battery resists memory formation, and will last hundreds of recharges.

{ 5000-1639 }

Model No.	Description	Case Qty.	Case Wt.
